

System Level Testing – Sample Test Case Matrix

Below is a sample Test Case in simple format with sample data. It is a great way to track system testing for smaller projects:

Tester(s)	Jane Smith, John Doe				Date	06/23/2018	
Test Name	Validity of Home Page Navigation				Test ID	REDONKS-HPN1	
Purpose	To make sure all the navigation links and buttons in the header area operate correctly on the home page.						
Prerequisites	Access the home page by going to http://www.redonks.com/CIT261/project/index.html .						
Step #	Description	Actions (How to Test)	Test Data	Expected Result	Actual Result	Pass/Fail?	Comments
1	Validate Home button	Home link on the navigation bar (in the upper right portion of the screen)	None	Home page jumps to the top (slideshow)	Home page jumped to the top (slideshow)	P	This does not rebuild the page, it jumps to the anchor in HTML
2	Validate Services button	Click on the Services link on the navigation bar	None	Page jumps to the Services section	Page jumped to the Services section	P	This does not rebuild the page, it jumps to the anchor in HTML
3	Validate Contact button	Click on the Contact link on the navigation bar	None	Page jumps to the Contact form	Page jumped to the Contact form	P	This does not rebuild the page, it jumps to the anchor in HTML

4	Validate Top button	Scroll down until the button appears, OR Click on Services OR Contact link, then click on the Top button	None	Page jumps to the top (slideshow)	Page jumped to the top (slideshow)	P	
5	Validate Logo (Home) button	Click on the Mighty Geeks logo in the upper left corner of the display	None	Page jumps to the top (slideshow)	Page jumped to the top (slideshow)	P	This jumps to the anchor for the top of the home page in HTML
